

Visual Arts - Creating a sense of depth

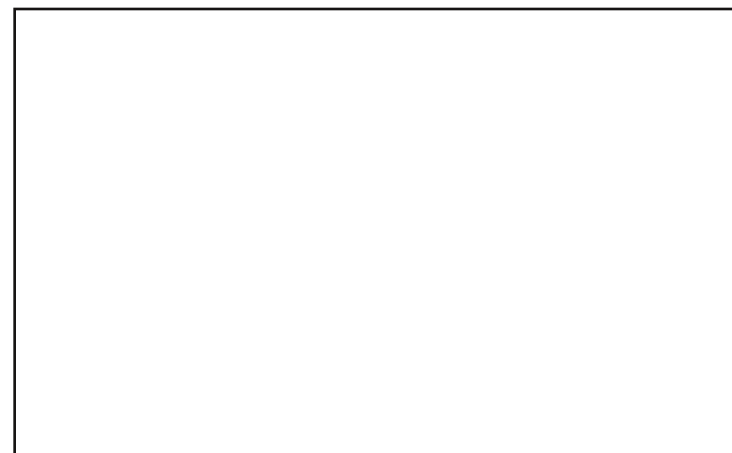

Use the large rectangle to come up with a large number of ideas (up to 120).

Then choose the 10 best ideas and circle them. In the four smaller boxes, make thumbnail drawings of different combinations of ideas.

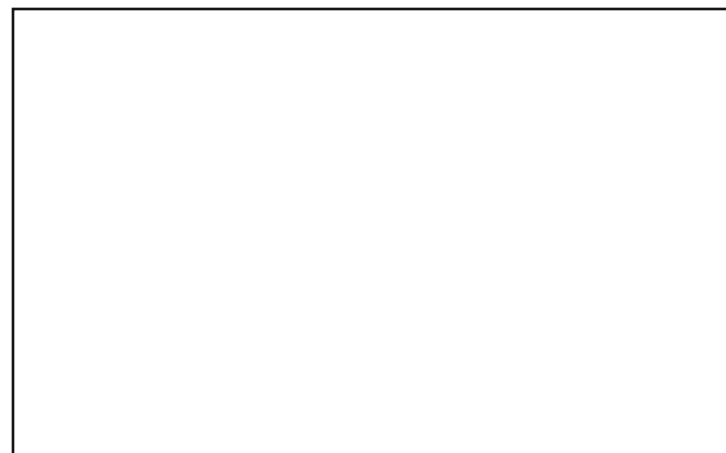

Overlap

Create a sense of space by having the nearest element in front of and cutting off part of the far object.

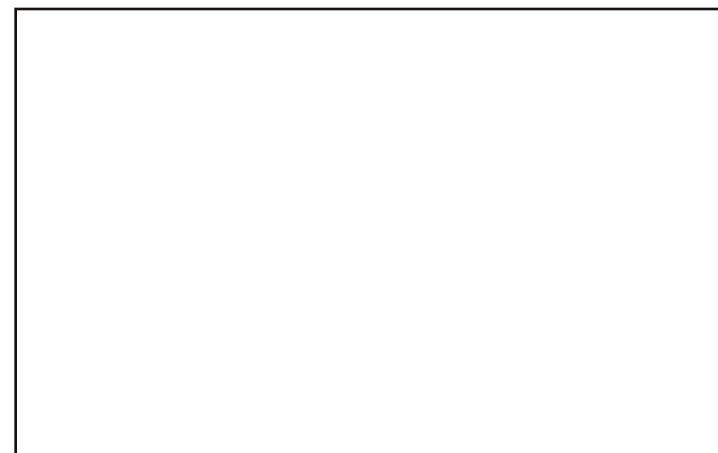

Size

Create a sense of space by having the near element be much larger than a far one.

Distance from bottom of page

Create a sense of space by having the near element toward the bottom of the page and the far one higher.

Contrast

Create a sense of space by shading the near object with high contrast and the far one with muddy greys.
